

Start Achieving Your Lifelong Goals in Just 30 Minutes With This Amazing Technology!

Dear #name#,

Is it worth 30 minutes out of your life to achieve goals you have been struggling with for years... or even worse... your entire life?

Do you want to:

- Stop procrastinating
- Lose weight
- Gain freedom from fears
- Develop a better memory and the ability to concentrate
- Quit smoking
- Rediscover your youthful vitality

Paraliminal recordings can help you reach your goals and change your life in as little as 30 minutes!

And... it's amazingly easy. Just put on a Paraliminal CD, relax, listen and get ready to *enjoy your results*.

Paraliminal CDs are very different than subliminal self help recordings

If you've tried traditional self help tapes with subliminal messages you know you had to listen to them for **30 to 60 days** to get results.

And even after all that time you were likely to experience *little to no* success.

That's because in subliminal messages there are hidden positive statements in music or environmental sounds, but there's no proof your brain can act on these types of messages!

With Paraliminal, you hear one voice in one ear speaking to one part of your brain, while another voice in your other ear speaks to a different part of your brain.

The cofounder of Learning Strategies Corporation, Paul R. Scheele has spent three decades researching and testing this technology.

"I listened to the *Memory Supercharger* for three months and significantly improved my memory. I became a memory horse."
Peter Knight, New York, New York

Processing two voices speaking at one time is too hard for your conscious mind so it closes down, which puts you into a deeply relaxed state.

This opens the rest of your mind to take in the instructions and message at a deeper level.

This way of processing a message can help you get you the results you are looking for in a very short time.

Imagine being able to....

- Energize and become more mentally alert in just 10 minutes
- Increase your focus and concentration and double your productivity in XX minutes
- Build your self esteem, improve your will power, determination and stamina in XX minutes

“Paul Scheele’s Paraliminal sessions are a significant breakthrough technology. They provide a powerful enhancement to any personal development effort.”
– Anthony Robbins, author of *Awaken the Giant Within* and *Unlimited Power*

There are a total of 30 CDs for you to choose from depending on what areas of your life you want to work on.

Download your free booklet that describes each CD for you at:
